EDUCATION

University of Auckland, Auckland

Bachelor of Science, Computer Science and Psychology – GPA: 8.3	2021
Bachelor of Science (Hons) with Second Class First Div Hons, Computer Science – GPA: 6.1	2022
Master of Engineering with First Class Hons, Bioengineering – GPA: 7.6	2024

PROFESSIONAL EXPERIENCE

DataAnnotation, Remote

2024-08 –
Current

AI Model Trainer

- Engineered agentic coding scenarios to investigate and identify areas of model limitation.
- Containerized codebases using Docker for consistent deployment environments.
- Created custom evaluation criteria and benchmarking frameworks for model evaluation.
- Wrote detailed comparison reports regarding model performance across both objective and subjective metrics.
- Worked extensively with Gemini 2.5 Pro, Gemini 2.5 Flash, Sonnet 4, GPT 4o, and custom models.

University of Auckland, Auckland

2022-01 –
2024-07

Computer Science Graduate Teaching Assistant

- Provided one-on-one consultation for undergraduate courses.
- Led interactive tutorial sessions.
- Invigilated closed-book examinations and assessments.
- Marked assignment submissions and delivered constructive feedback.
- Collaborated with course coordinators to maintain teaching alignment and quality.

Hell Pizza, Auckland

2021-01 –
2022-02

Kitchen Hand

- Responsible for handling customer enquiries and resolving issues.
- Carried out kitchen operations while adhering to food safety standards.

PROJECTS & EXTRACURRICULAR

Master's Project: Pipeline for Reconstructing Neuronal Spiking Activity

2024-07

<https://github.com/ABI-Animus-Laboratory/neurodynamics>

- Developed a three-stage Python pipeline to reconstruct neuronal activity from calcium recordings through Spiking Neural Network optimization.
- Conducted comprehensive data analysis and visualization of experimental results.
- Authored a 25,000 word thesis documenting research aims, methodologies, and findings.
- Managed and stored sensitive data with a focus on research and confidentiality.
- Collaborated with a multi-disciplinary team throughout a year-long neuroscience project.
- Implemented version control using Git to track progress and manage code iterations.

Trivia Game Web App

2024-09

<https://github.com/m00zy/TriviaApp>

- Created a Trivia Game web app using React and Tailwind CSS.
- Fetched trivia data from the Open Trivia Database using Fetch API.
- Implemented navigation and routing using React Router.

Badminton Club President, University of Auckland

2022

- Led a 25-member committee in organising and overseeing weekly sports sessions, social events, and tournaments.
- Managed membership registrations and session sign-ups.
- Awarded Sports Club of the Year, marking a first-time achievement in the club's history.
- Established both short-term and long-term goals to guide the club's development.

SKILLS

Programming languages: Python, SQL, Java, JavaScript

Computer software/ frameworks: numpy, matplotlib, pandas, scikit-learn, VS Code, React, Cursor, Claude Code

Tools: Git, Jupyter Notebooks, Docker, Linux
